

Invitation for Bids

Reclamation District No. 108

Gravel Procurement for Sacramento River Settlement Contractor Salmon Habitat Restoration Projects

Reclamation District No.108 (RD-108) is requesting bids to provide the production and delivery of gravel for up to five Restoration projects in the Upper Sacramento River. These services will be provided starting no earlier than November 15, 2024 and completing no later than September 30, 2026 with an anticipated extension through September 30, 2028.

The bids must be provided on the attached Quote Sheets, sealed and delivered to the following address no later than noon (12 PM) Friday, October 31, 2024. Submission deadlines are firm and late submissions will not be considered.

A bid for the Middle Creek Project should be submitted separate from the other Restoration Projects (as delineated in bid sheets 1 and 2) as this project will occur the soonest and has completed designs. Bid envelopes should be labeled with the Project number(s), and may be delivered by mail to the address below, or in person to the District Office (975 Wilson Bend Rd. Grimes, CA).

Reclamation District No. 108
ATTN: Jordon Navarrot
PO Box 50
Grimes, CA 95950

Bids will be opened at 1:00 PM on November 1st, 2024 in the RD-108 Board Room at 975 Wilson Bend Rd. Grimes, CA 95950.

Bid documents are available online at www.rd108.org . Please provide any inquiries to Jordon Navarrot at jnavarrot@rd108.org or via phone to (530) 437-2221 ext. 3.

Bid Evaluation & Award

Bids will be awarded to the lowest responsive, responsible bidder. All bids are to be compared on the basis of the District Manager's estimate of the quantities of work to be done. The determination of the lowest Bidder shall be based on the bid with the lowest sum of all Schedules.

The District shall have the right to reject any and all bids not suitable to the best interests of the District; to waive any informality in a bid proposal, and to make awards as it deems appropriate in its sole discretion. The District may readvertise for new bids or negotiate an offered bid, if it is the sole bid received and the negotiated price does not exceed the offered bid for the work as advertised. If no bids are received, the District may proceed to complete the project(s) by force account or contract without proceeding to additional bidding processes.

The bid award, if made, will be made within five (5) days after the opening of the bids. If the lowest responsible Bidder refuses or fails to execute the contract, the District may award the contract to the second lowest responsive and responsible Bidder. Such award, if made, will be made within thirty (30) days after the opening of the bids. The periods of time specified above within which the award of contract may be made shall be subject to extension for such further period as may be agreed upon in writing between the District and the Bidder.

Bidder Instructions

Bids submitted to the District by Contractors who are not licensed in accordance with the provisions of Chapter 9, Division III of the Business and Professions Code, State of California, shall be considered non-responsive and shall be rejected by the District. Prospective Bidders shall be skilled, regularly engaged and licensed in the general class or type of work specified and possess a valid California Class "B" Contractor's License.

The submission of a bid shall be conclusive evidence that the Bidder has investigated and is satisfied as to the conditions to be encountered, as to the character, quantity, and scope of the work to be performed, the quantities of materials to be furnished, and as to the requirements of the proposal, plans, specifications, and the contract. Prime Contractors planning to subcontract any portion of the work or improvement contained in the plans and specifications, in an amount in excess of one-half of one percent ($\frac{1}{2}$ of 1%) of the Prime Contractor's total bid, or ten thousand dollars (\$10,000), whichever is greater, shall list the Subcontractor for the portion of work which will be done in accordance with California Public Contract Code, Section 4100, et seq. Each Subcontractor is required to possess a valid California Contractor's License.

Prevailing Wages & DIR Registration

In accordance with the provisions of Sections 1770 to 1781 of the Labor Code, the Director of the Department of Industrial Relations has ascertained the general prevailing rate of wages applicable to the work to be done. For more particular details, and a schedule of the applicable prevailing rate of wages, contact the office of the State's Division of Labor Statistics and Research or the nearest Bureau of Field Enforcement or the State Division of Labor Standards Enforcement.

This project is subject to compliance monitoring and enforcement by the Department of Industrial Relations. All contractors and subcontractors who bid or work on a public works project must register and pay an annual fee to DIR. No contractor or subcontractor may be listed on a bid proposal for a public works project unless registered with the Department of Industrial Relations pursuant to Labor Code section 1725.5.

Bid Protests

Any bid protest must be submitted in writing to the District's Manager before 5:00 p.m. of the 5th business day following bid opening. The initial bid protest document shall contain a complete statement of the basis for the protest. The protest shall refer to the specific portion of the document which forms the basis for the protest. The protest shall include the name, address and telephone number of the person representing the protesting party. The party filing the protest shall concurrently transmit a copy of the initial protest document and any attached documentation to all other parties with a direct financial interest which may be adversely affected by the outcome of the protest. Such parties shall include all other Bidders who appear to have a

reasonable prospect of receiving an award depending upon the outcome of the protest. The procedure and time limits set forth in this section are mandatory and are the Bidder's sole and exclusive remedy in the event of Bid protest and failure to comply with these procedures shall constitute a waiver of any right to further pursue the bid protest, including filing a Government Code Claim or legal proceedings.

SCOPE OF WORK

Gravel Procurement for the Sacramento River Settlement Contractor Salmon Habitat Restoration Projects

Site Location/Access

Location: Reclamation District 108 will provide maps of the project(s) design at least 30 days prior to the project start date.

Access: Reclamation District 108 will provide access routes to the project(s) at least 30 days prior to the project start date.

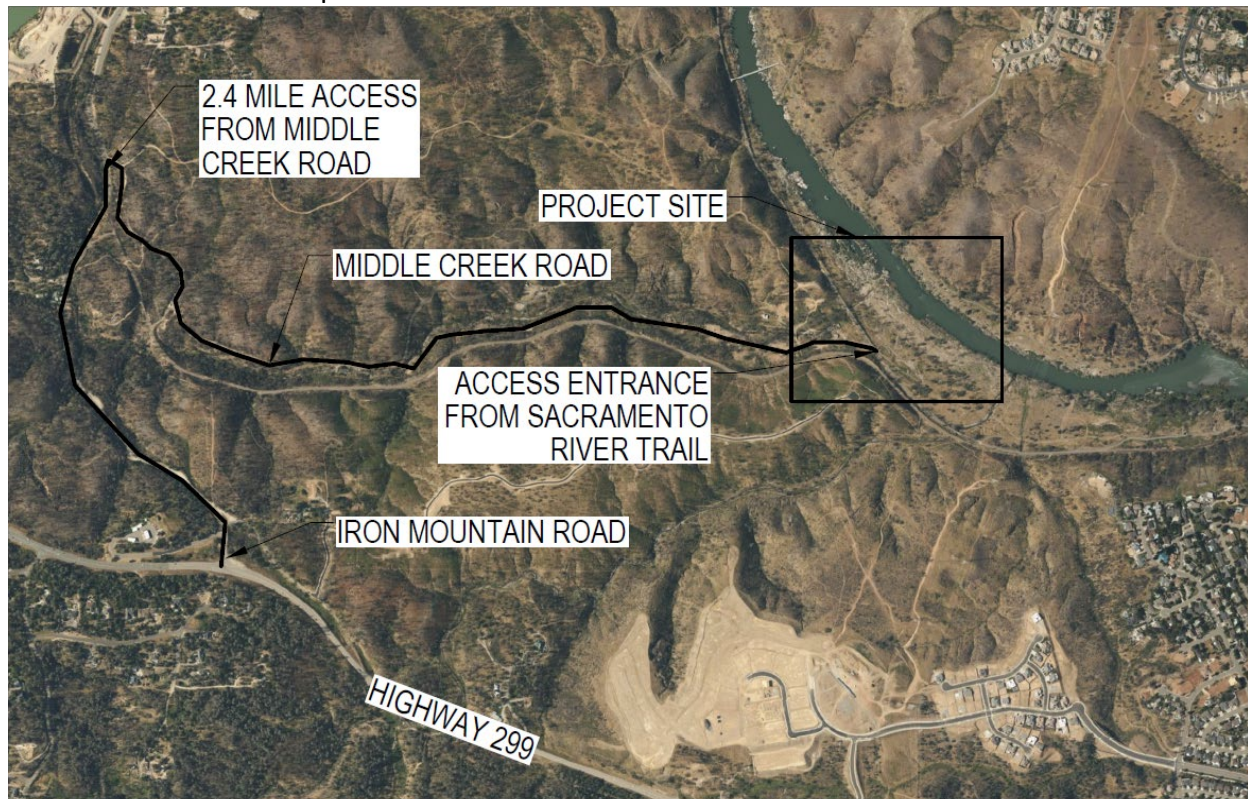

Scope of Services

Schedule: In general, projects will occur within a designated construction window of November through April. Reclamation District 108 will provide detailed schedule information for the project(s) at least 30 days prior to the project start date.

Project Details (Bid #1): Middle Creek

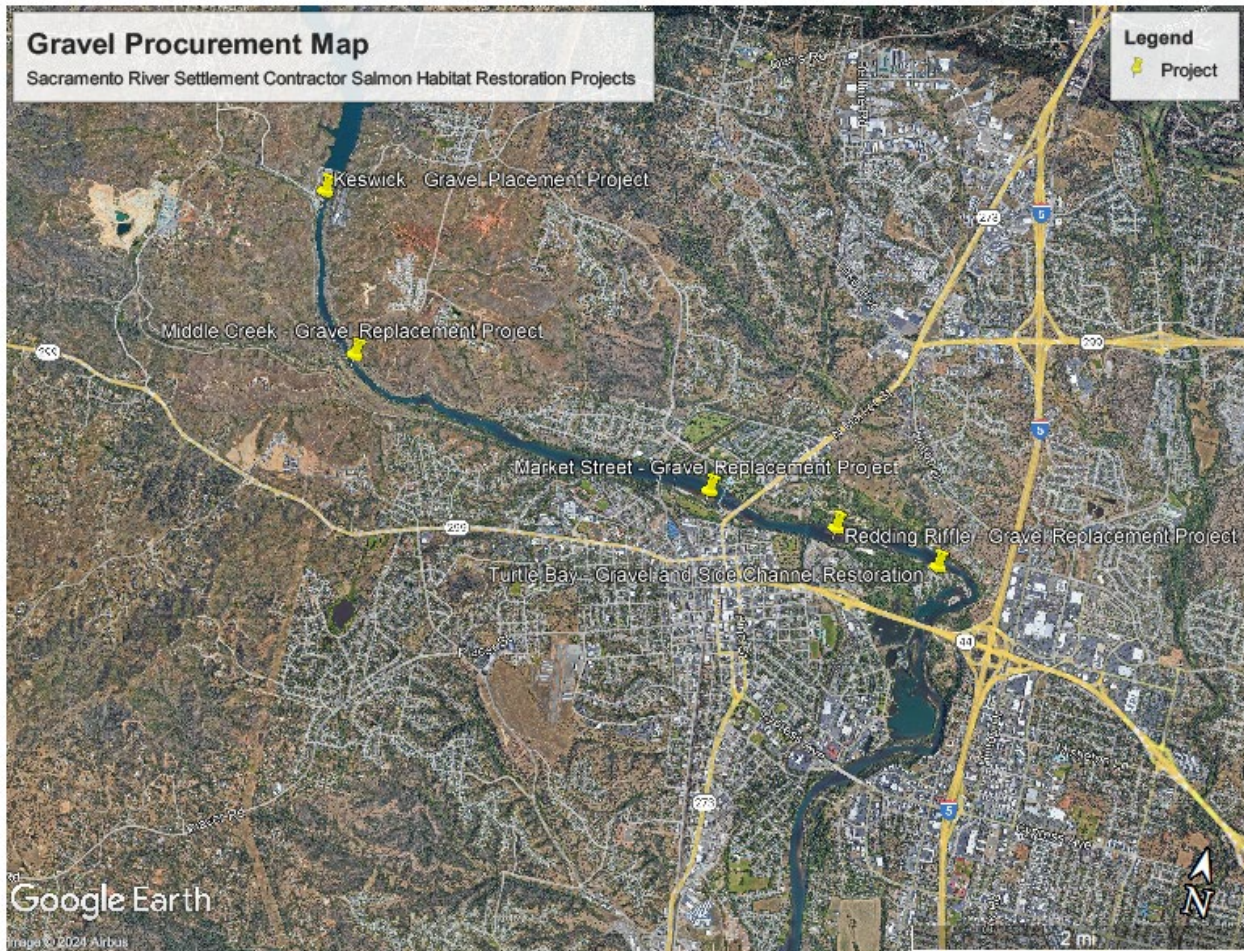

Project Name	Anticipated Start	Maximum Quantity
Middle Creek	December 1, 2024	Spawning Gravel – 4,000 tons 2'+ Cobble – 500 tons

Middle Creek access map:

Project Details (Bid #2): Future Restoration Projects

Project Name	Anticipated Start	Maximum Quantity
Redding Riffle	January - February, 2025	Spawning Gravel - 8,000 tons (pending final design)
Keswick	2025 – 2026 (Up to 2028 with Extension)	Spawning Gravel Up to 23,000 tons (pending final design and selection)
Market Street		
Turtle Bay		

Materials and Delivery: The Contractor shall furnish and deliver Suitable Materials of the following specifications:

- **Cobble Specifications** – Acceptable gravel sources include commercial sources, deposits outside active stream channels at or above the 100-year flood plain, and from the alluvial fan of tributary streams forming the inlets of the Central Valley Project Reservoirs. Gravel must be uncrushed, rounded natural river rock with no sharp edges. Cobble shall be 2'+ standard size.

- Spawning Gravel Specifications** – Acceptable gravel sources include commercial sources, deposits outside active stream channels at or above the 100-year flood plain, and from the alluvial fan of tributary streams forming the inlets of the Central Valley Project Reservoirs. Gravel must be uncrushed, rounded natural river rock with no sharp edges. Gravel shall meet the following size requirements:

Gravel Size	
Particle Size (Diameter)	Percent Passing*
4-inch	95-100%
2-inch	75-85%
1-inch	40-50%
¾-inch	25-35%
½-inch	10-20%
¼-inch	1-5%

*Passing indicates the percent of the total material passing through a screen correlating to the diameter indicated in the left-hand column

No gravel shall be smaller than 1/8 inch in diameter. Gravel shall be completely free of dirt, silt, sand or any other fine particulate material less than 1/8 inch in diameter. In addition, gravel shall be completely free of oils, clay, debris and organic material. Gravel must be washed at least once and have a cleanliness value of 85 or higher based on Caltrans Test #227.

- Gravel Testing** – Prior to the commencement of the job, the Contractor will take one sample of the gravel at the production source. The Contractor shall have the gravel tested for both size and cleanliness at a certified/accredited laboratory.

Initial gravel testing shall occur near the beginning of the production of the mix or after the first approximately 1,000 tons has been processed. Purpose of early inspection is to confirm compliance with quality of material specifications and remedy any concerns prior to delivery.

- Gravel Inspections** – The Contracting Party or its affiliates will be given complete and unfettered access to inspect the production of gravel at the production location/source. Inspections will ensure that delivered gravel meets all requirements of this contract. The Contracting Party or its affiliates will exercise discretion as to when and how many additional samples will be taken.

The Contracting Party has the right to reject spawning gravel delivered to the job site that does not appear to meet specification for size and cleanliness. Any dispute on the acceptability of the spawning gravel shall be resolved by the testing of the spawning gravel, at the Contractor's expense, at a certified/accredited laboratory.

- Method of Delivery** – The Contractor shall provide all the necessary equipment, labor, and materials to load and transport the gravel to the site. Only semi-end dump, super dump, or 10-wheeler trucks shall be used to deliver gravel materials. Up to 2,000 Tons of gravel will be delivered daily. Gravel will be dumped by the contractor directly into the area identified by the Contracting Party.

To verify the amount of gravel delivered, the Contractor shall weigh each loaded truck at a

certified scale. Contractor shall submit each individual truck's weight slip showing the amount of gravel delivered to the Contracting Party or its affiliates at the time of delivery as well as a scale sheet showing the total deliveries for each workday.

The Contracting Party or its affiliates will provide staff and equipment to coordinate dumping at the placement area.
